Carrier Objective

Computer Science undergraduate (B.Tech CSE, 2022–2026) with hands-on experience building and deploying AI-enabled, full-stack systems. Strong in C++ and Python, with practical exposure to backend architecture, APIs, and production deployment. Seeking a software engineering role focused on scalable, real-world systems.

Education

B.Tech in Computer Science & Engineering	2022 – 2026
Technocrats Institute of Technology (Excellence), Bhopal	CGPA: 7.25
Senior Secondary (12th): Saraswati Shishu Vidya Mandir	61%
Secondary (10th): BNS DAV Public School	81.4%

Projects

AI-Powered Bank Management System

React, TypeScript, Node.js, PostgreSQL

- Built a production-oriented banking application with conversational AI and secure transaction workflows.
- Integrated LLaMA-3 via Groq with ORM-level safeguards to prevent unsafe database access.
- Implemented backend APIs and containerized deployment using Docker, Railway, and Vercel.

DeepWebResearcher — AI Research Aggregator

React, Flask, Python

- Developed an AI-assisted research system that converts queries into structured, fact-checked summaries.
- Implemented PDF ingestion, claim verification pipelines, and LaTeX-based report generation.
- Integrated OpenAI, Tavily, and OpenRouter APIs using a modular abstraction layer.

Personal Portfolio Website

Bootstrap, React

- Built a responsive portfolio to showcase projects, technical focus, and deployment experience.

Technical Skills

Languages: C++, Python

Frontend: HTML, CSS, React, TypeScript

Backend & Tools: Node.js, Express, PostgreSQL, WebSockets, Git, Docker, Flask, Fastapi

Achievements

- Participated in Google Arcade Cohort 2 2025.
- Independently built and deployed multiple AI-enabled platforms.

Soft Skills

Problem-solving, system-oriented thinking, team collaboration, adaptability
