SUMMARY

Computer Science undergraduate with hands-on experience in building scalable backend systems, real-time collaboration platforms, and secure web applications using Spring Boot, Angular, WebSockets, Redis, and MySQL. Skilled in microservices architecture, REST API development, and problem solving with 700+ coding problems solved on competitive programming platforms. Passionate about software engineering, distributed systems, and developing impactful technology solutions through innovative projects and hackathons.

EDUCATION

Technocrats Institute of Technology

B.Tech in Computer Science and Engineering

Bhopal, Madhya Pradesh

2022 – 2026

CGPA: 8.75/10.0

BNS DAV Public School

Senior Secondary Education — **88.4%**

Giridih, Jharkhand

2019 – 2021

BNS DAV Public School

Secondary Education — **90.2%**

Giridih, Jharkhand

2018 – 2019

TECHNICAL SKILLS

Programming Languages: C++, Java

Backend: Spring Boot, REST APIs, Microservices

Frontend: Angular, HTML5, CSS3

Databases: MySQL, Redis

Tools and Platforms: Git, GitHub, Docker, RabbitMQ, WebSockets

Authentication: JWT, OAuth2

PROJECTS

CodeSync – Real-Time Code Collaboration Platform | *Spring Boot, WebSockets, Redis, MySQL*

- Developed a real-time platform for simultaneous multi-user code editing, utilizing WebSockets and Redis for low-latency message brokering.
- Architected Spring Boot microservices and RESTful APIs for hierarchical file management, enhancing system scalability and modularity.
- Implemented secure user authentication using JWT and third-party OAuth (Google/GitHub) to protect user data and sessions.
- Built RESTful APIs for project creation, file hierarchy management, and collaboration workflows, ensuring clean separation between frontend and backend.
- Implemented concurrent editing control mechanisms to manage conflicts during simultaneous updates by multiple users.

Improving Sumatra PDF Reader using Fuzzing | *WinAFL, DynamoRIO, Visual Studio, C++*

- Conducted security assessment of Sumatra PDF v3.5.2 using WinAFL and DynamoRIO to detect memory corruption and buffer overflows.
- Identified critical vulnerabilities and edge cases, documenting findings with severity ratings to significantly reduce the attack surface.
- Discovered potential crashes and vulnerabilities in PDF parsing modules and documented reproducible test cases with severity analysis

Kishan Setu – Farmer-Buyer Digital Marketplace | *HTML5, CSS3, Node.js, MySQL*

- Developed a full-stack web platform connecting farmers directly with buyers to ensure fair pricing, utilizing Node.js APIs and MySQL for transactions.
- Designed responsive interfaces optimized for low-bandwidth rural accessibility across desktop and mobile devices.
- Implemented product listing, search, and basic buyer-seller interaction features.

ACHIEVEMENTS

- **Smart India Hackathon 2024 – Finalist:** Selected among top teams nationwide for developing an innovative solution at a national-level government-backed competition.
- **CodeChef – Gold Badge:** Solved 700+ problems across difficulty levels; earned Gold Badge in Problem Solving; participated in 50+ contests with a 50+ day streak.
- **NSS 'B' Certificate:** Recognized for outstanding commitment to social service and community development through sustained volunteer work and NSS leadership activities.

SOFT SKILLS

Team Collaboration · Analytical Thinking · Communication · Time Management · Adaptability · Problem Solving
